# Experiment No.10

## 1. Title:

To load and display JSON data using JavaScript fetch() and jQuery $.getJSON() methods and render the data dynamically in an HTML table.

## 2. .Software/Tools Required:

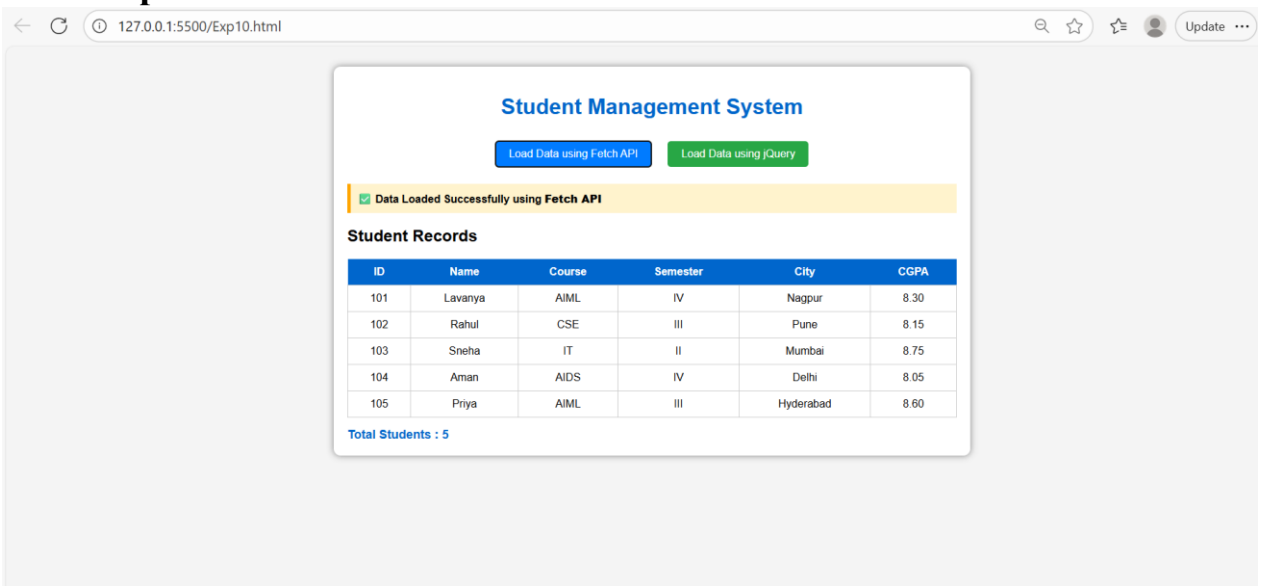

- Visual Studio Code
- Web Browser (Google Chrome/Microsoft Edge)
- HTML5
- JavaScript (ES6)

## 3. Theory:

JSON (JavaScript Object Notation) is a lightweight data-interchange format commonly used for exchanging data between servers and web applications. The fetch() API retrieves data asynchronously using Promises, while jQuery's $.getJSON() simplifies fetching JSON data. The retrieved data is dynamically displayed in an HTML table.

.

## 4.Output:

## 5.Result/Conclusion:

The program successfully retrieved JSON data using fetch() and $.getJSON() and dynamically displayed it in an HTML table, demonstrating asynchronous data loading and DOM manipulation.
