Experiment No.7

1. Title:

To perform **DOM traversal and manipulation** by developing a **To-Do List application** with Add, Edit, and Delete functionalities.

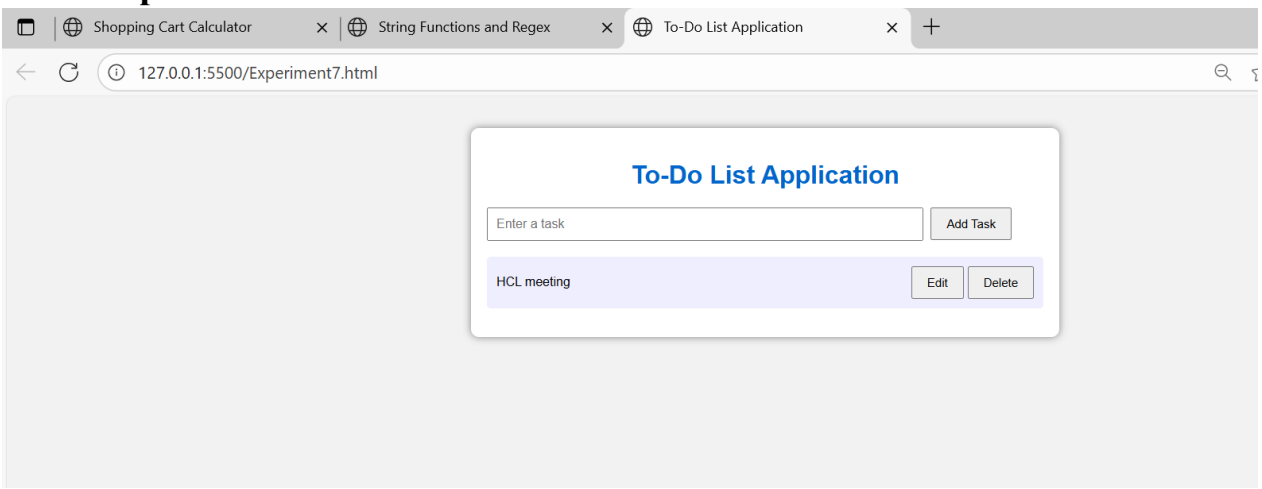

2. .Software/Tools Required:

- Visual Studio Code
- Web Browser (Google Chrome/Microsoft Edge)
- HTML5
- JavaScript (ES6)

3. Theory:

The Document Object Model (DOM) represents an HTML document as a tree structure. JavaScript can access, modify, create, and delete HTML elements dynamically using methods such as getElementById(), querySelector(), createElement(), and removeChild(). Event handling enables interaction with the webpage.

4.Output:

5.Result/Conclusion:

The To-Do List application successfully demonstrated DOM manipulation and event handling by dynamically managing tasks.
