Experiment No.5

1. Title:

To apply JavaScript array methods and object handling by creating a Shopping Cart Total Calculator with Discount Logic.

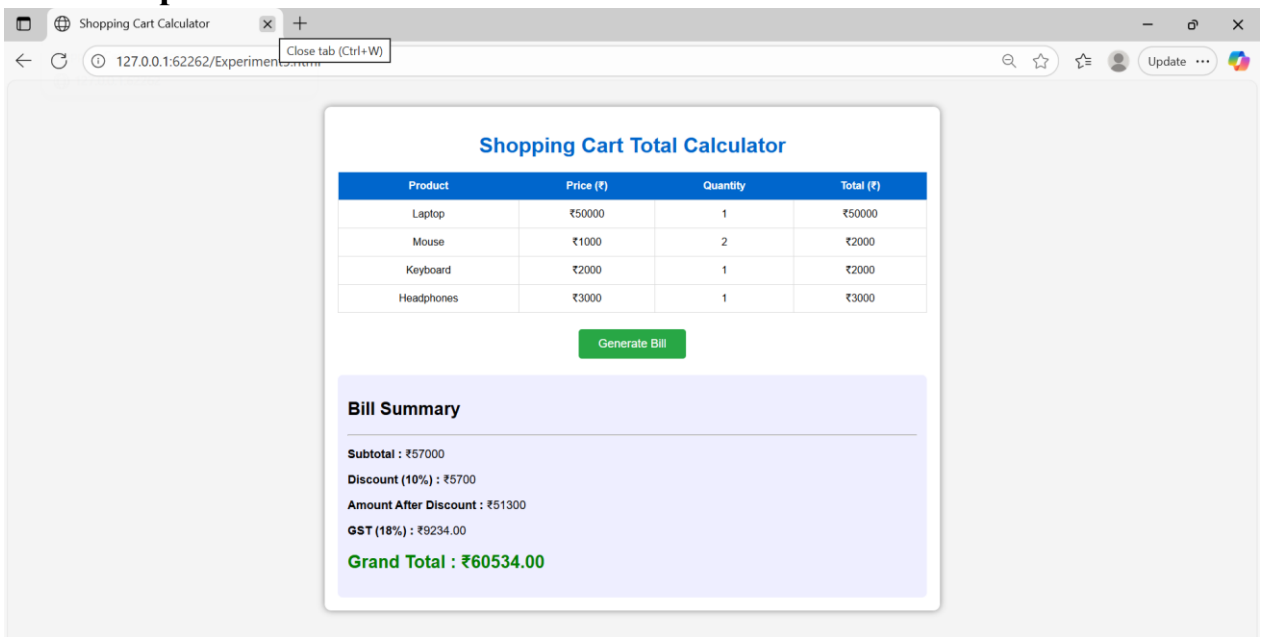

2. Software/Tools Required:

- Visual Studio Code
- Web Browser (Google Chrome/Microsoft Edge)
- HTML5
- JavaScript (ES6)

3. Theory:

Arrays are used to store multiple items, while objects store related data in key-value pairs. JavaScript provides array methods such as map(), filter(), and reduce() to manipulate data efficiently. In this practical, product details are stored in objects inside an array. The total amount is calculated, and a discount is applied based on predefined conditions.

4. Output:

5.Result/Conclusion:

The shopping cart calculator was successfully implemented using JavaScript arrays and objects. The total bill and discount were calculated correctly using array methods.
